New Lenox Grade School Band to give Concert March 22nd

TO BEGIN WORK ON LINCOLNWAY HI SCHOOL SOON

The meeting of the board of Lincolnway community high school, District 210, which was tentatively set for last Friday night and at which bids for the school were to be let, was not held. It is scheduled for this Friday night at Mokena school. Construction of the building will begin as soon as weather permits.

The final architect's drawing of the new high school, to be built on Route 30 east of New Lenox, has been approved. This drawing, which supercedes a great many that have been made is shown above. The building faces south.

A great many changes in the plans of the new high school have been made since plans for the building were first presented. Previously the shop was in the rear of the building at the east end, but it has now been brought to the front at the east end and faces south. A change has also been made in the gym, at the west end of the building. This has been brought more to the front and set at an angle. By making this change they have been able to save about 200 feet of corridors, with resultant saving of considerable money. There will be about 640 feet of corridors.

The total cubic footage in the building is 1,278,000 and the total square feet of floor space is 73,200.

The cafeteria also has been brought further to the front of the auditorium, and they have eliminated the expensive lounge in connection with the cafeteria. Under present arrangements, one driveway will serve all school departments.

MOKENA FIRE DEPT. HAS BUSY WEEK END

The Mokena Volunteer Fire department answered several calls during the past week because of grass fires. Last Friday the farm land of Roy Kropp along Wolf road and the Southwest highway, was afire, with a strong southwest wind helping it along. The department was called to put out a grass fire in Sunny Acres and last Saturday there was another grass fire in Sunny Acres.

At about noon Saturday the Mokena fire department was summoned to extinguish a fire on the roof of the barn in the rear of the Alfred Hatch property on Front street. August Pfleger had been burning some rubbish when a spark was blown up to the shingle roof of the building adjacent and quickly ignited. The firemen were able to put out this fire without much damage.

Also last Saturday there was a fire on the farm of Glenn Peterson, on Maple road, which burned over 35 acres of new clover seeding, which had been seeded last fall. This fire, which Mr. Peterson said seemed to sweep along at a rate of about 20 to 25 miles an hour, was halted by a narrow strip of winter wheat on the east side of the northeast 40 acres. This green winter wheat acted as a barrier and prevented the flash fire from leaping over to the farm of Fred Wannemacher, adjoining. The wind was blowing a gale of 30 to 35 miles an hour from the southwest. A group of neighbors quickly gathered and fought the fire, but could make little headway against it, and at one time were forced to run into the green wheat field to save themselves from the onrushing flames. The fire department was not called in this case because they did not have time to put in the call it was all over so quickly. The fire started in the dry grass and weeds along the Wabash tracks.

Sunday, the Mokena fire department was called out twice. The first trip was to a fire on West 192nd street where someone had evidently tossed a lighted cigarette carelessly into the grass, which seems to be dry as tinder despite the recent heavy snowfall. The fire quickly spread west, and had it not been for a slough to the west of this property, it would have made its way to the Harold Jones farm close by.

The department was called out to another grass fire Sunday afternoon, at the Leo Marcoux home, south of Mokena. They had been burning rubbish, a spark from which had ignited the dry grass in the surrounding area.

The Mokena fire department would like to warn people to be very careful about starting fires in this season of high winds and drought, and if they do start one to give it closest supervision. A fire should not be started if there is any chance of sparks flying to an adjoining area. Before starting a fire give serious consideration to wind velocity and other factors, and weigh the chances of being able to put out the fire without the assistance of the fire department if possible.

F. Heusner Manager Of Equipment Co.

The Frankfort Motor & Equipment Co., dealers in automobiles and farm machinery, are continuing business as usual since the sudden death on February 15 of the owner, Walter C. Haas. The business is now operating under the management of Fred Heusner.

If you have a wife and 2 children, your share of the national debt on a population basis, is approximately \$7,000, says an ad in "World Petroleum."

The Mokena village board met in regular session Tuesday evening. All members were present, with the exception of James Fassett. As he is chairman of the building code, there was, therefore, no report made on the contemplated new building code.

The village of Mokena is now insured for liability and property damage. W. A. Mueller, insurance broker of Mokena, who handles the matter, suggested to the board that they appoint one board member to be in charge of the insurance carried by the village. The rates for this insurance will be based on the amount of labor employed by the village.

Willard Martie was present and complained again about the same dog that destroyed the cushions on his swing on his porch last summer. This dog again paid a visit to his home last week and tore off and destroyed clothing that was hanging on a line in their yard, and also crashed into and broke a basement window. Mr. Martie requested the village board to enforce the ordinance which this board has already passed.

This dog has been under the care of the Sisters of St. Mary's school at the convent on Wolf road, who have said they do not want the dog. No license has ever been paid on this dog.

Recently a man who was walking to his home in Mokena went to Police Chief Carter and requested him to take him home in his car, because so many dogs were congregated in front of his home he was afraid to approach the house for fear of being bitten. Mr. Carter complied.

The board instructed Police Chief Carter to make arrangements, if possible, for the impounding of stray dogs caught in Mokena, in the dog pound in Joliet. An ordinance now in effect requires dogs that are picked up to be impounded for three days to give the owner an opportunity to redeem them.

The board instructed Ed. Hentsch to hire two dog catchers as soon as possible. Men for this occupation are available, it was pointed out.

The board will advertise for bids to repair and paint the water tower and structure, put on a new roof on the tower and a new overflow downspout. The board will meet March 24 to open the bids.

Two bills were not allowed by the board because they believe them to be excessive. One was that of Elmer Schoeneck who did some repair work at the village hall, and the other was the auditor's bill for auditing the books this year. The board held up the auditor's bill because the auditors had agreed that the first audit of the books a year ago would be \$300, but the next auditing would be substantially lower. However, the bill for the next audit was still \$300. The auditor's defense was that they had lost money on the first year's audit, and, therefore, charged the same amount for the second audit to make up the loss on the first.

The board requested Harold Spiess, mayor, to contact the state highway department and ask them to extend the speed limit zone beyond the village limits of Mokena. This has been requested by residents of Woodland Circle, south of Mokena, and Sunny Acres, north of Mokena, who frequently walk to town on the highway and are menaced by the cars which travel along at dangerous speeds.

The board gave Police Chief Carter a list of owners of cars who are delinquent with vehicle stickers for collection.

Drama Club Calls For Habillments Of Gay Nineties

The Methodist Dramatic club is enmeshed in searching attics and old trunks for costumes in which to clothe their "Ladies in Retirement" when they are presented to the public on April 9, 10 and 11 at Haven school, New Lenox.

Do you have anything that might be appropriate that you would be willing to lend? Do you know of any source? You might find it fun to see your Old Aunt Nellie's going away skirt trodding the board's on one of the dear old "Ladies in Retirement."

Particularly needed, vintage of 1890, are dresses, bags, aprons, shawls and a man's suit and furnishings, ulster and bowler hat. Our Alfred has a 36 inch waist line and 46 inch shoulder.

Your help will be greatly appreciated. Just call Jane Schlotterer, New Lenox 5474, who will be happy to hear from you.

ANNOUNCE ENGAGEMENT

Mr. and Mrs. Harvey Wilson of Hebron, Ind., are announcing the engagement and approaching marriage of their daughter, Betty June, to Mr. James H. Gillette, son of Mr. and Mrs. E. H. Gillette of Mokena. The wedding will take place in June.

Want Air-Spot Post For Frankfort: To Hold Meet. Mar. 13

A U. S. air force ground observant civilian defense meeting will be held in Frankfort gymnasium March 13, at 8:15 p.m., immediately after the regular Frankfort PTA meeting which will be held in the same place. A representative of the U. S. Air Force Ground Observation Corps will be present, and will show a 30-minute film of a simulated air attack on New York City.

The object of this meeting is to set up an observation post in Frankfort. There is no such observation post to spot airplanes flying between Joliet and Chicago Heights. The Ground Observation Corps deems Frankfort a vital spot which by all means should have such a post. They would like three or four representatives from every organization in Frankfort to attend this meeting, and, in addition to this, everyone in Frankfort and surrounding area is invited.

The Ground Observation Corps has already formulated plans for the Frankfort post. They now have 640 posts in Indiana, Illinois and part of Iowa and Wisconsin, but only 50 of these are in operation. Frankfort is included in this 640-post plan between Joliet and Chicago Heights.

With the beginning of "Operation Skywatch" in July of 1952 thousands of volunteers all over the United States began donating several hours a week in watching for aircraft in their local posts or working as plotter in filter centers. Soon, however, the novelty of aircraft spotting began to fade, and only a few hundred citizens have remained loyal to their duty of protecting us from enemy attack.

Russia has increased her long range bomber force to the world's largest and is now more than able and ready to throw a knockout punch at the United States. It is only our constant vigilance in maintaining an efficient air defense system that will save us from the destruction of enemy bombers.

Each of us is responsible to carry out this duty. It is essential to our very existence. Are you doing your part?

Another of Mokena's old time residents, Mr. Frank E. Hirsch, 90, died in the home of his daughter, Mrs. Harry Mall, of Mokena, Saturday night. Mr. Hirsch, who had been quite feeble, was confined to his bed for the past three weeks.

Following this he returned to Mokena where he operated a tavern. In all, he lived in Mokena for 40 years, having retired from the tavern business about 12 years ago. Since then he has made his home with his daughter, Mrs. Mall.

Surviving, besides Mrs. Mall is a son, Frank Jr., of Chicago, a brother Charles, of Chicago Heights, two grandchildren and four great grandchildren. Another daughter preceded him in death.

Last Rites For John Schenkel Saturday

Following a two weeks illness, John Schenkel, died in his home on Front street, Mokena, early Wednesday morning. He suffered a stroke the day previous.

Born in Frankfort township, 70 years ago, he lived in this vicinity all his life, part of which was spent on a farm. His parents were the late Conrad and Kathryn Gruber-Schenkel. He never married and was employed as a miscellaneous laborer. The body was removed to the Hirsch chapel at Tinley Park where friends may call Friday afternoon and evening.

Surviving is a niece, (Elda) Mrs. Walter Spiess and a nephew Edward Schenkel both of Mokena.

It is hoped that the concert will be well attended. These young musicians and their director promise an exceptionally fine concert.

REFRIGERATOR GAS ENDANGERS 3 IN TRAILER

Mr. and Mrs. Herman Weichbrodt and family, of Peotone, who recently moved to a farm on Sauk trail—the first one east of Frankfort—had a narrow escape from death by gas last Thursday evening. They have been living in a trailer during the remodeling of their house. When Mr. Weichbrodt arose last Friday morning to do the chores he had a violent headache, the cause of which he was unable to guess. However, he did his chores in the usual course and then went to the trailer for breakfast.

Upon entering the trailer he discovered that his wife and two sons were still asleep. Thinking that the moving had exhausted his wife, he made his own breakfast without waking her and then went out to finish his chores at the barn.

About this time Ralph Fehland, oil man, stopped to bring gas and other fuels. Herman told him to go to the trailer where his wife would pay the bill. Upon arriving at the trailer Mr. Fehland found Mrs. Weichbrodt lying on the floor, evidently unconscious, so he called to her husband. They took her and the two boys, one three and the other Billy, 5, to the home of her parents, the Williams Koerners.

Mrs. Weichbrodt and Billy were very ill with what was later discovered to be caused by gas from a leaky refrigerator. It was found necessary to take Mrs. Weichbrodt to the Hedge clinic, where oxygen was administered. She is now slowly recovering from the effects of the gas, as is her son, Billy.

The severe headache which Mr. Weichbrodt noticed at the time he woke up that morning had been caused by gas which had incapacitated his wife and son.

The WSCS of the Methodist church met at the home of Mrs. Stewart Loebe last Thursday for an all day session with 25 ladies present. A great deal of fancy work was accomplished. At noon Mrs. Lester Sayers and Mrs. Howard Sayers served the dessert and coffee. Those attending brought sandwiches.

At the business session, it was voted to purchase two new collapsible tables for the dining room and from time to time several more until there is the required number the room can accommodate. We also decided to give a Chop Suey supper on the 12th of March.

The Orland public library has secured a number of new books. Among them are for adults: "The Sojourner" by Marjorie Kinnan Rawlings; "The Intruder" by Helen Fowler; "Desiree" by Anne Marie Selinko; "The Magic Lantern" by Robert Carson; and "Hunter" by J. A. Heinlein; "Between Planets" by Robert A. Heinlein; "Bullard of the Space Patrol" by Malcolm Jameson. From time to time other books will be listed. The community is invited to register with the library and make use of these fine books.

Mail Brochures For Music Festival

Brochures of the 1953 Chicago-Land Music Festival announcing details of the 24th annual festival to be held in Soldier's Field, Chicago, August 22 were mailed last week to music leaders throughout the United States and Canada. A major feature of the festival concert will be a "Salute to Hollywood." Film studios are cooperating with the Chicago Tribune Charities, Inc., sponsor of the event, which annually attracts crowds of more than 80,000 persons.

On Friday afternoon, August 21, two Festival luncheons with similar programs featuring many of the stars of the Festival concert, will be held in the ballrooms of the Conrad Hilton hotel and the Palmer House. Three thousand persons are expected to attend.

Farm Help Lowest On Record

The number of workers on U. S. farms in late December, estimated at 6 1/2 million persons, was both a seasonal low and the lowest on record, according to U. S. Department of Agriculture figures.

It was the time of the year when most farms had only routine chores to do.

The bureau of agricultural economics estimated this to be 22

percent below the previous month, but also down 1 percent from the record low of a year ago. Farm wage rates on January 1 averaged 3 percent higher than a year ago.

M. E. Dramatic Club Of New Lenox To Produce New Play

The Methodist Dramatic club of New Lenox met Friday, February 20 to experiment with making up themselves. The cast

for "Ladies in Retirement" were particularly glad to have an opportunity to try out their appropriate faces. With a splendid cast lined up for this new play, it is being enthusiastically rehearsed, and will be produced Thursday, Friday and Saturday nights, April 9, 10 and 11.

The play concerns the efforts of a conniving spinster to convince her employer and benefactor who is a retired chorus girl that she should take in and provide for two more spinsters who are, to put it charitably, a little touched. The characters and dialogue give ample opportunity for making a really good performance, and one that will be enjoyed by all. The players are: Jane Schlotterer, Betty Morrison, Mary Greenman, Dorothy Sheeler, Rhea Campbell, Jane Anderson and Lewis Loebe. Mr. Loebe enjoys the distinction of being the only man in the cast, which position he is thoroughly savoring.

Highway Building Costs Show Sharp Increase Per Mile

The nation is headed for some big spending on highways if the current trend toward highway construction continues, according to Chas. M. Hayes, president of the Chicago Motor club. But the figures are deceiving, Mr. Hayes cautions, as costs of highway building have risen so sharply that far less road is obtained for the money spent.

Income Tax Service J. J. CONNELLY

17510 Highland
Tinley Park, Ill.
KEllogg 2-4727

Money spent on highways and streets in the United States reached the highest level in history during 1951. An estimated \$4,261,000,000 was spent by federal, state and local governments that year.

"This figure is more than twice the \$1,863,000,000 provided for the same purposes in 1945—a scant seven years ago."

It is necessary to remember that though these figures indicate an encouraging start towards solving the highway problem,

costs have increased to the point where the amount of highway obtained for the money spent has been sharply reduced.

Hayes provided the following breakdown of total expenditure: Federal government, \$459,000,000; State government, \$2,660,000,000; Local government, \$488,000,000; and Urban, \$654,000,000.

In Illinois a proposed program of primary highway construction and rehabilitation calls for the spending of \$93,134,000 during 1953. Of this sum, \$26,000,000 will be in the form of Federal aid.

The development of expressways in Chicago's metropolitan area will account for \$14,555,000 in next year's program. These allocations include: Congress street, \$9,535,000; Edens expressway, \$60,000; North Lake Shore drive extension, \$500,000; North west route \$4,050,000; South route \$410,000.

BABSON SAYS—

Babson Park, Fla., Feb. 27.—The constantly increasing shorter hours, combined with higher prices which are largely the result of shorter hours, are developing a new industry—namely the "Do it yourself" industry.

House Decorations

For a time the manufacturers of paint, wallpaper, etc., in order to protect the local painters and paperers, refused to advertise their products for the housewife to use herself. Now, however, you will find large advertisements in leading magazines urging people to "short circuit" the local artisan.

To further this "Do it yourself" movement, manufacturers now sell wallpaper already hung, with the blank margins cut off. They are selling paint rollers to take the place of brushes and a new paint with a rubber base for quick and perfect application. What Gillette did to the old-fashioned razor, this new movement is doing to brushes and paints.

Homes and Furniture

For several years families have been able to buy unpainted and knocked down furniture at the prices were high on the latter. Today, however, one needs to buy only ply-board and certain metal clamps from a lumber dealer. For a small fee the lumber dealer will cut the pieces as needed for tables and chairs.

The big development has been in young people building their own homes. Two couples will buy adjoining lots, make joint contracts for the foundations, and then go ahead with different plans. These plans can be bought with complete details for ordering, cutting and erecting the house. For heavy work when two men are needed, they help each other. The only outside help needed is a plumber. This may explain why a prominent columnist stated "The new President's Cabinet consists of eleven millionaires and one plumber!"

Practical Hobbies

Physicians are now prescribing hobbies instead of pills. In fact, hobbies are now so used that most drug stores sell Hobby magazines. These magazines urge useful hobbies and show furniture, toys and other things may be made at home. They are great boosters of the "Do it yourself" industry.

Not only does the hobby industry benefit the nation's health, but by it parents set a fine example to their children. It not only is better for the kids to see their Dad working—instead of playing golf—but it enables the father and boy to work together and become better acquainted. Hence, the social and educational advantages.

New Stores Will Open

I believe you will see "Do it yourself" stores open. If I were a young chap and wanted to open a small specialty store, I would enter this field, combining some sporting goods with it. The same factors of shorter hours and higher costs are forcing many families to indulge in inexpensive and healthful sports.

Another suggestion is that you become a salesman on commission for some lumber dealer to sell "Build It Yourself" Houses. It would interest almost every young couple to at least hear your story. It also might be combined with the real estate business. Before building a house one must secure the land.

Something to Consider

I have often wondered why house builders do not sell furniture and home furnishings. Or why furniture dealers do not

sell houses. This is a combination which should appeal to many customers and should be advertised in the local newspapers.

In fact, as I look into the future, I expect to see much more local advertising of this "Do it Yourself" idea. Many newspapers are afraid to push it for fear of offending the local builders, painters, furniture dealers, and other present advertisers. I, however, believe this to be short sighted because the future of every newspaper and every present advertiser depends ultimately on the growth of the community, which depends on the adoption of all new ideas.

State's Attorney Makes Report On Criminal Cases

Since his election last November, Frank H. Masters, State's Attorney for Will County, reports the following disposition of criminal cases arising under indictments returned by the recent grand jury:
There were seventeen persons against whom the grand jury returned indictments. The defendants so indicted by the grand jury were charged with the crimes of murder, armed robbery, larceny, arson, embezzlement, forgery, rape and statutory charges, and in the indictments returned, a total of thirty five charges were made against them.
All of the cases arising through the indictments returned have been processed and disposed, with the exception of two matters which have been continued to the next jury calendar. In all of the other cases, the defendants either pleaded guilty or were found guilty and have been sentenced to the Illinois State Penitentiary for varying terms of years, depending upon the charges against them. Three young men who had pleaded guilty to a charge of burglary and who had no previous criminal record were permitted to join the army. Two others who had no previous criminal record were placed on probation by the court.
Of the seventeen persons indicted, twelve were of the age of twenty five years or under, the average age being twenty-two and a half years. Of the twelve, nine had prior criminal records. This latter situation, with regard to the youth of a majority of the defendants who had previous criminal records, would indicate that renewed attention must be given to the all-important question of juvenile delinquency. The young men who were indicted by the grand jury, who had previous criminal records, had gone a long way upon the path of criminal misbehavior.
As stated in a recent editorial in the Christian Science Monitor the causes and prevention of crime lie in the causes and prevention of juvenile delinquency, which, in turn, require the best efforts and interests of all good citizens in shaping the standards of thinking and behavior of the youth.
At the present time there are matters pending that require action by a grand jury in March and, accordingly, none will be called.

Living Alert
Lesson for March 8, 1953

WHAT is this parable of the "foolish virgins" all about? Dr. Wehrli of Eden Seminary makes a simple straightforward suggestion. The story has to do with emergency, the unexpected and how to meet it. If everything had gone according to plan, the foolish virgins would not have been in trouble. They had all the oil they thought they would need. When they set out, it was the wise virgins who looked foolish. Why carry those extra flasks of oil? Wasn't it enough to carry a lamp without being bothered with oil besides? But when the hours wore on and on, those extra flasks did not look so foolish. The wise virgins were ready for the unexpected; the foolish were not.

Life's Emergencies

If the future were as plain to us as the past, then (we think) life might be easier. But that is not the way life goes. There is much we can count on; other-wise there would never be any use in making any kind of plans.
But there also will be things ahead we don't count on. Disease or death may enter the home unannounced. Temptation may lift its ugly head among the flowers of our happiness. The person who goes through life prepared only for what he expects, will find himself in the dark. Only by being prepared for what we don't expect, can we rise to life's emergencies.
But how can we prepare for what we don't expect? Of course we can't prepare in detail for the unforeseen. What we can manage to have is a reservoir of strength; for physical emergencies reserves of health; for moral emergencies, reserves of character; for spiritual emergencies, reserves of faith.

Dr. Foreman

The Unexpected Is The Test

When there is a big fire, or some extraordinary disaster like a bombing or an explosion, the police of a great city will send reserves to the stricken area to guard against looters. Now as Dr. Wehrli says, the police aren't specially worried about ordinary criminals.
But the people who do the looting at fires are the ordinary people, who in ordinary situations wouldn't think of stealing. They are honest enough for all routine situations. They would not think of breaking a door down in order to steal. But when a fire or an earthquake opens the door, and the lights go out, then these "honest" people turn into thieves. They don't have the reserves of character to carry them through the moral emergency.
Sometimes again the emergency will be an opportunity. When an important position falls vacant, who is chosen to fill it? The man who is ready for it. But who is ready for the bigger job? The man who worked harder than he needed to on the smaller job; the man who learned more than he had to know to hold down the smaller job. If a man isn't ready for a bigger job than he has, he isn't likely ever to get his chance at it when the bigger one is open.

On The Alert

Three pieces of advice can be given to those who wish to live on the alert. One is: Keep physically fit. That may sound too obvious, but it is not, as any doctor could tell you. If your health breaks down you are stopped in your tracks no matter what your work may be. Whether you aim to be a missionary, a farmer or a governor, you are going to need all the health you can have. Don't cut down your body's efficiency by the use of liquor, drugs, overeating, undersleeping or what not.
The same can be said of the second point: Keep mentally fit. Keep your mind a bit sharper than it needs to be right now, sharp enough for the unlooked-for opportunity or problem or responsibility.
Again it is needless to say that the use of alcohol is one of the commonest enemies of mental fitness.
And finally: keep spiritually fit. The Holy Spirit is no substitute for your own hard and careful thinking; but the closer you live to the God who is Lord of both today and tomorrow, the more ready you are going to be for whatever he may send.

ROGER BABSON TO CONTRIBUTE TO THIS PAPER

Roger W. Babson, a pioneer in the field of business and financial statistics has become a weekly contributor to this newspaper. His article will appear on an inside page.

He will discuss business and investments, jobs and wages, land and building, living costs and retail trade, inflation and taxes and other topics of the day.

The views of this man whose keen business judgment is tempered with an awareness of dependence on a Higher Authority are of inestimable value.

Follow his column each week and profit from his advice.

American business has no more inspiring personality than Roger W. Babson, internationally known business commentator and investment adviser. An outstanding feature of his philosophy has been his life long insistence on the importance of religion in business.

Born and reared in an old-fashioned atmosphere of hard work and hustle on a farm in Gloucester, Mr. Babson went to the Massachusetts Institute of Technology. Upon graduating, he instinctively turned to financial and business activities.

His exertions, however, undermined his health; he contracted tuberculosis and was sent West "as good as dead." It was while he was convalescing from this dread malady that he worked out some of the possibilities and problems of business forecasting. His weekly releases are used by over 400 newspapers and his financial reports by 20,000 corporations and estates. His research work is carried on by a large staff of workers.

Mr. Babson has probably done more than any other man to create among his millions of newspaper readers an interest in simple business problems, and to install a broader vision in businessmen, enabling them to meet the ups and downs of the business cycle.

2 Tools in 1— It puts you Dollars ahead!

As a Tandem Disc Harrow, its eight 20-inch notched discs on front gangs, and ten 18-inch notched discs on rear gangs break chunks of clay and sod—pulverize, level and finish.

As a Bush and Bog Harrow with rear disc gangs folded over the front gangs, it becomes a bush and bog harrow with nearly 90 pounds on each of its eight front discs—to chop and churn tough, trashy surface growth.

In both positions, the Dearborn Fold-Over Disc Harrow lifts or lowers by Ford Tractor Hydraulic Touch Control. Built strong—weighs about 720 pounds—it's a real time and money saver. See us soon for a demonstration.
